

Fall 2014
GMS 6792 - GRADUATE RESEARCH SEMINAR
11:00 am -12:00 pm
Wednesday in Room C1-7
Course Director: Jada Lewis, Ph.D.

Date	Speaker	Title
Aug 27	Kristy Green Shimp	Cognitive and Neural Mechanisms of Risky Decision Making
Sep 3	Barbara Perez	Molecular Mechanisms of Reduced Penetrance in Spinocerebellar Ataxia Type 8
Sep 10	Matt Hamm	LRRK2-mediated tau phosphorylation as a driver of tauopathies
	Danielle Sambo	Modulation of methamphetamine-mediated dopamine transporter activity by the sigma-1 receptor
Sep 17	Vinita Chittoor	Beneficial role of chaperones in PMP22-related peripheral neuropathies
Sep 24	Gina Martuscello	Energy metabolism and proliferative signaling in Glioblastoma
Oct 1	June Jung	Biologic and therapeutic implications of gamma-secretase modulators in Alzheimer's disease
Oct 8	Sofia Beas	Cortical Inhibition and Behavioral Flexibility in Aging
Oct 15	1st Year Rotations	
Oct 22	Lynne Mercier	Brainstem Respiratory Plasticity Following a Cervical Spinal Cord Injury
Oct 29	James Graham	Chondroitinase C selectively degrades inhibitory proteoglycans
Nov 5	Linda Bean	Estrogen Receptor Alpha Extends the Critical Window for Estrogen Treatment
Nov 19	Jeff Fortin	Transplantation of defined populations of differentiated human neural stem cell progeny
Dec 3	1st Year Rotations	
Dec 10	Emily Dabe	Regulation of Neuronal Identity
	Rachel Sanford	Epigenomics of Injury, Memory, and Development
