

Neuromedicine Summer Seminar Series 2016

Mondays, 12:00 – 1:00pm

DeWeese Auditorium, McKnight Brain Institute

Seminar Coordinators: Paramita Chakrabarty, PhD and Joseph McQuail, PhD

Date	Speaker	Seminar Title
June 6*	Steven DeKosky, MD Lucia Notterpek, PhD David Borchelt, PhD Habibeh Khoshbouei, PharmD, PhD Jennifer Bizon, PhD Sara Burke, PhD	Overview of Neuromedicine Research
June 13	Paramita Chakrabarty, PhD Department of Neuroscience	Tauopathy in seeded models: where do we stand?
	Mayur Parmar, PhD Department Neurology	The role of STX6 and MOBP in the development of tauopathy
June 20	Joseph McQuail, PhD Department of Neuroscience	Molecular and physiological determinants of age-related working memory decline
	Sarah Johnson, PhD Department of Neuroscience	Hippocampal and cortical contributions to stimulus discrimination deficits in aging
June 27	Jacob Ayers, PhD Department of Neuroscience	SOD1 Pseudo-prions and ALS
	Benoit Giasson, PhD Department of Neuroscience	Alpha synuclein propagation: myths and reality
July 11	Jeremy McIntyre, PhD Department of Neuroscience	Novel mechanisms of neuromodulation in the olfactory bulb
	Matthew Sarkisian, PhD Department of Neuroscience	Primary Cilia in Brain Development and Brain Cancer
July 18	Kaustuv Saha, PhD Department of Neuroscience	Alpha synuclein modulates the activity of dopamine neurons
	Gonzalo Torres, PhD Department of Pharmacology	TBA
July 25	Edgardo Rodriguez, PhD Department of Pharmacology	Workshop: Neuroscience @ UF - applying imaging and molecular tools to study brain diseases
	Marcelo Febo, PhD Department of Psychiatry	
Aug 4	SNIP Student Poster Presentations	Venue TBA

*seminar will be held in C1-7 in Communicore
