

Neuromedicine Summer Seminar Series 2019

Mondays, 12:00 – 1:00pm

DeWeese Auditorium, McKnight Brain Institute

Seminar Coordinators: Dr. Cara Croft and Dr. Katherine Wright

Date	Speaker	Seminar Title
June 3	Dr. Jose Abisambra Dr. Jennifer Bizon Dr. Sara Burke Dr. Eduardo Candelario-Jalil Dr. Marcelo Febo Dr. Andrew Maurer Dr. Jeremy McIntyre Dr. Kevin Otto Dr. Leah Reznikov	Faculty Research Data Blitz
June 10	Dr. Hannah Shorrock Molecular Genetics & Microbiology Department, UF	Spinocerebellar ataxia type 8: RAN translation and white matter pathology
	Dr. Lauren Laboissonniere Molecular Genetics & Microbiology Department, UF	Developing immunotherapies for the treatment of C9 ALS/FTD
June 17	Dr. Amanda Dossat Neuroscience Department, UF	Endoplasmic Reticulum: in Health and Disease
	Dr. Brandon Warren Pharmacodynamics Department, UF	Neuronal ensembles in drug addiction
June 24	Dr. Caesar Hernandez Neuroscience Department, UF	GABA _B Rs in prelimbic cortex and basolateral amygdala differentially influence intertemporal decision-making and decline with age
	Dr. Lorena de Mena Alvarez Neurology Department, UF	Differently similar: Drosophila as a powerful model for human neurodegenerative disorders
July 1	Dr. Sharonda Harris Pharmacology & Therapeutics Department, UF	TBA
	Dr. Adrienn Varga Pharmacology & Therapeutics Department, UF	Pontine Mechanisms of Opioid-Induced Respiratory Depression
July 8	Dr. José Peña Bravo Pharmacology & Therapeutics Department, UF	Olfactory Cortex Function in Aging and Alzheimer's Disease
	Dr. Hillary Cansler Pharmacology & Therapeutics Department, UF	Neural circuits underlying attention to odors
July 15	Dr. Erik Oleson Associate Professor of Psychology, University of Colorado Denver	More than a reward molecule: The role of dopamine in aversively motivated behavior
July 22	Dr. Matthew Hamm Neuroscience Department, UF	TBA
	Dr. Karen McFarland Neurology Department, UF	TBA
