

UNIVERSITY OF FLORIDA
COLLEGE OF MEDICINE SYLLABUS
NEUROSCIENCE
GMS 6022, Principles of Neurophysiology (3 credits)

Semester: Spring 2023
Delivery Format: in-person
Tuesday and Friday 9:30 – 11:00 am

Instructor Name: Drew Maurer
Room Number: LG-101A DeWesse Auditorium
Phone Number: Maurer 352-273-5092
Email Address: drewmaurer@ufl.edu
Office Hours: Dr. Maurer- upon request
Preferred Course Communications: Email

Prerequisites: Must be a graduate student in Neuroscience or related discipline (e.g., Psychology, Pharmacology, Clinical Health Psychology, Biomedical Engineering, Pharmacodynamics)

Purpose and Outcome: *This semester course provides the fundamental principles of electrical properties and synaptic signaling in excitable cells. Students will gain an understanding of the physiological properties of the nervous system, including how ions and ion channels govern the membrane potential and excitability, and how signaling properties arise at the single neuron level to manifest as larger networks that support behavior. Following the function of individual cells, the manner in which they are connected will be covered, including synaptic signaling between neurons. We will cover the molecular make-up of synapses, and different kinds of synapses, the quantal theory of transmission, and neuromodulation. Course material will also cover the different types of synaptic plasticity mechanisms that make synaptic strength use-dependent. The course includes a review of model systems and neural circuits in integrative neurophysiology, as well as the relation of neural circuits to behavior and cognitive processes.*

Course Overview: This course will focus on the physiology of the nervous system from the microscopic scale to the interaction of the brain with the body and environment.

Relation to Program Outcomes: This course fulfills the requirements for Academic Credits for graduate students in the Neuroscience program.

Course Objectives and/or Goals:

By the end of each semester, students will be able to:

- Describe the basic cellular physiology of neurons
- Describe different types of cellular communication
- Identify the different types of ionic current and describe how that gives rise to resting membrane potential and action potential propagation.

- Describe the role of interneurons in shaping neural dynamics
- Identify circuit level physiology in normal and disease states.
Detail different molecular tools to study neuronal function

Instructional Methods: Instructors and students will attend in-person.

Description of Course Content:

Topical Outline/Course Schedule

Week	Day	Lecture	Lecturer
1	1/10/2023	Intro and course overview	Maurer
	1/13/2023	Nernst and GHK equation, current-voltage relationships <i>Kandel Ch 6; Hille Ch 1</i>	Alvina
2	1/17/2023	Passive properties: capacitance, time and space constants <i>Kandel Ch 6</i>	Alvina
	1/20/2023	Action potential/ Hodgkin-Huxley <i>Kandel Ch 7; Hille Ch 2</i>	Alvina
3	1/24/2023	Voltage-gated channels versus Ligand-gated channels <i>Kandel Ch 5,7; Hille Ch 3,19</i>	Maurer
	1/27/2023	LTP/LTD, genes and memory	Burke
4	1/31/2023	Synaptic mechanisms from quantal analysis to synaptic plasticity	Foster
	2/3/2023	The Neuro-muscular Junction	Dr. Lan Wei-LaPierre
5	2/7/2023	Exam 1	
	2/10/2023	Central synapses <i>Kandel Ch 8, 10,12; Hille Ch 6</i>	Moehle
		Metaneuron 3 Lab: synaptic currents	
6	2/14/2023	GPCR and second messenger-gated ion channels I <i>Kandel Ch 11</i>	Moehle
	2/17/2023	GPCR and second messenger-gated ion channels II <i>Kandel Ch 11</i>	Moehle
7	2/21/2023	Can you smell what's cooking? (Signal transduction of the olfactory system)	Mcintyre
	2/24/2023	"Hormones, gene transcription and physiology"	Casadesus,
8	2/28/2023	Exam II	
	3/3/2023	Dynamics of small circuits Readings: Sharp, A. A., Skinner, F. K., & Marder, E. (1996). Mechanisms of oscillation in dynamic clamp constructed two-cell half-center circuits. <i>Journal of Neurophysiology</i> , 76(2), 867–883. Bargmann, Cornelia I., and Eve Marder. "From the connectome to brain function." <i>Nature methods</i> 10.6 (2013): 483.	Maurer

		Gutierrez, Gabrielle J., Timothy O'Leary, and Eve Marder. "Multiple mechanisms switch an electrically coupled, synaptically inhibited neuron between competing rhythmic oscillators." <i>Neuron</i> 77.5 (2013): 845-858.	
9	3/7/2023	Interneurons and plasticity in spinal cord	Dale
	3/10/2023	Interneurons and the importance of network balance in the brain Berg, Rune W., Alex Willumsen, and Henrik Lindén. "When networks walk a fine line: balance of excitation and inhibition in spinal motor circuits." <i>Current Opinion in Physiology</i> 8 (2019): 76-83.	Maurer
10	3/14/2023	SPRING BREAK (happy pi day)	
	3/17/2023	SPRING BREAK	
11	3/21/2023	Rhythms of the Brain 1 Buzsáki, György, Costas A. Anastassiou, and Christof Koch. "The origin of extracellular fields and currents—EEG, ECoG, LFP and spikes." <i>Nature reviews neuroscience</i> 13.6 (2012): 407-420.	Mauer
	3/24/2023	Rhythms of the Brain 2 <i>Kandel ch. 46</i>	Maurer
12	3/28/2023	Human Neurophysiology	Keil
	3/31/2023	EXAM III	
13	4/4/2023	Physiology of Neurodegeneration	Chakrabarty
	4/7/2023	Memory 1 Schwindel, C. Daniela, and Bruce L. McNaughton. "Hippocampal–cortical interactions and the dynamics of memory trace reactivation." <i>Progress in brain research</i> . Vol. 193. Elsevier, 2011. 163-177. Josselyn, Sheena A., Stefan Köhler, and Paul W. Frankland. "Heroes of the engram." <i>Journal of Neuroscience</i> 37.18 (2017): 4647-4657.	Burke
14	4/11/2023	Memory	Maurer
	4/14/2023	Computational neuroscience – pros and cons	Maurer
15	4/18/2023	Physiology of the Prefrontal Cortex	Padilla-Coreano
	4/21/2023	Manipulating neural circuits: Optogenetics, DREADDS and other in vivo methods for assessing and manipulating neural circuits in vivo	Setlow
16	4/24/2023	EXAM (IV)	

Course Materials and Technology:

From Neuron to Brain, Fifth Edition by John G. Nicholls(Author), A. Robert Martin(Author), Paul A. Fuchs

Principles of Neuroscience, Fifth Edition, by Kandel, Schwartz, Jessel, Siegelbaum and Hudspeth

Supplemental reading: Ion Channels of Excitable Membranes, Third Edition, by Bertil Hille as well as readings assigned special readings corresponding to specific lectures.

For technical support for this class, please contact the UF Help Desk at:

- Learning-support@ufl.edu
- (352) 392-HELP - select option 2
- [UF eLearning](#)

Academic Requirements and Grading:

Assignments:

There will be 4 exams based on lecture content and will involve multiple choice, short answer and essay questions. Grades will be determined from performance on 4 exams and class participation.

Once per semester, students will be permitted to replace their lowest exam score by writing a single "Journal Club" on a paper of their choice that published within the last 12 months. This will follow the Journal of Neuroscience format (http://www.jneurosci.org/site/misc/ifa_features.xhtml) and should have three components: a short overview of the background of the reviewed paper, a critical data-based review of the key findings, and a brief summary of the significance relative to the concept in the current course. The Journal Club should focus on the most important results (it is not necessary to discuss each figure), and a successful paper will offer a critical evaluation the results in the context of other work. The length should be between 1200 and 1500 words.

Grading:

Requirement	Percent Final Grade
Participation	10%
Exam 1	22.5%
Exam 2	22.5%
Exam 3	22.5%
Exam 4	22.5%

--	--

Point system used (i.e., how do course points translate into letter grades).

Percent age Earned	Letter Grade
93-100	A
90-92	A-
87-89	B+
83-86	B
80-82	B-
77-79	C+
73-76	C
70-72	C-
67-69	D+
63-66	D
60-62	D-
Below 60	E

Exam Policy: There are four exams in this course. Exams will be administered at the date and time specified in the syllabus.

Policy Related to Make up Exams or Other Work: You are expected to notify the course directors of any anticipated absences. You should make every effort to take the exams on the days they are scheduled. If extenuating circumstances prevent you from taking a scheduled exam, and you have an excused absence, you will need to schedule an appointment to meet with the course directors to identify an alternative exam date.

Please note: Any requests for make-ups due to technical issues MUST be accompanied by the UF Computing help desk (<http://helpdesk.ufl.edu/>) correspondence. You MUST e-mail me within 24 hours of the technical difficulty if you wish to request a make-up.

Policy Related to Required Class Attendance: You are expected to attend each lecture and actively participate in the problem sets. Participation is incorporated into the problem set grading.

Expectations Regarding Course Behavior: We expected all students to be in attendance for every lecture and participate in class discussions. Students should meet with the instructors as soon as possible regarding University-excused absences so that accommodations can be made on a case by case basis.

Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found at: <https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>.

Communication Guidelines:

Please see the NETIQUETTE GUIDE FOR ONLINE COURSES: <http://teach.ufl.edu/wp-content/uploads/2012/08/NetiquetteGuideforOnlineCourses.pdf>

Academic Integrity:

Students are expected to act in accordance with the University of Florida policy on academic integrity. As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge:

“We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.”

You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied:

“On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For additional information regarding Academic Integrity, please see Student Conduct and Honor Code or the Graduate Student Website for additional details:

<https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>
<http://gradschool.ufl.edu/students/introduction.html>

Please remember cheating, lying, misrepresentation, or plagiarism in any form is unacceptable and inexcusable behavior.

Online Faculty Course Evaluation Process:

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at <https://gatorevals.aa.ufl.edu/students/> . Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <https://ufl.bluera.com/ufl/>. Summaries of course evaluation results are available to students at <https://gatorevals.aa.ufl.edu/public-results/>.

Accommodations for Students with Disabilities:

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the Disability Resource Center by visiting <https://disability.ufl.edu/students/get-started/> . It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester. The College is committed to providing reasonable accommodations to assist students in their coursework.

Counseling and Student Health:

Students sometimes experience stress from academic expectations and/or personal and interpersonal issues that may interfere with their academic performance. If you find yourself facing issues that have the potential to or are already negatively affecting your coursework, you are encouraged to talk with an instructor and/or seek help through University resources available to you.

- The Counseling and Wellness Center 352-392-1575 offers a variety of support services such as psychological assessment and intervention and assistance for math and test anxiety. Visit their web site for more information: <http://www.counseling.ufl.edu>. On line and in person assistance is available.
- You Matter We Care website: <http://www.umatter.ufl.edu/>. If you are feeling overwhelmed or stressed, you can reach out for help through the You Matter We Care website, which is staffed by Dean of Students and Counseling Center personnel.
- The Student Health Care Center at UF Health is a satellite clinic of the main Student Health Care Center located on Fletcher Drive on campus. Student Health at UF Health offers a variety of clinical services. The clinic is located on the second floor of the Dental Tower in the Health Science Center. For more information, contact the clinic at 392-0627 or check out the web site at: <https://shcc.ufl.edu/>
- UF Health Emergency Room / Trauma Center: For immediate medical care call 352-733-0111 or go to the emergency room at 1515 SW Archer Road, Gainesville, FL 32698, ufhealth.org/emergency-room-trauma-center.
- University Police Department: Visit police.ufl.edu/ or call 352-392-1111 (or 9-1-1 for emergencies).

- Crisis intervention is always available 24/7 from:

Alachua County Crisis Center:

(352) 264-6789

<http://www.alachuacounty.us/DEPTS/CSS/CRISISCENTER/Pages/CrisisCenter.aspx>

Do not wait until you reach a crisis to come in and talk with us. We have helped many students through stressful situations impacting their academic performance. You are not alone so do not be afraid to ask for assistance.
